ICTACADEMY

PROJECTS

Skill and Job Recommender

Skill and Job Recommender is an application that provides information to help users apply for jobs. The application was developed using Angular, Spring Boot, HTML, CSS, JavaScript, Bootstrap, and SQL as the programming languages and technologies. It is hosted on a TomCat server and was created using the SpringToolSuit tool. The application offers a user-friendly interface to help users find job opportunities that match their skills and qualifications.

Railway Reservation System

Railway Reservation System is an application that provides four main functionalities: booking tickets, canceling tickets, printing booked tickets, and printing available tickets. The application was developed using Core Java as the programming language and Eclipse as the tool. It offers a user-friendly interface for customers to easily manage their railway reservations.
